SUMMARY

Software Engineer with 4 years of experience developing scalable full-stack systems using Java, Spring Boot, Node.js, React, Angular, and AWS. Skilled in designing clean architectures aligned with business goals, leading cross-functional teams, and delivering maintainable, high-impact applications. Strong big-picture thinker with a self-driven learning mindset and leadership experience.

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, MySQL, Oracle, MongoDB, HTML/CSS

Frameworks: Spring Boot, Node.js, React, Angular

Developer Tools: Amazon Web Services (AWS), Docker, Git, SVN

Other: REST APIs, Microservices, Domain Drive Design, Agile, CI/CD

EXPERIENCE

Software Engineer

October 2024 – Present

Likha-iT by freee.k.k.

Makati, Philippines

- Designed and implemented a payroll feature that generates standardized bank transfer files, enabling HR administrators to manage multi-bank salary disbursements across different accounts and branches.
- Developed and maintained a talent evaluation and performance management system to support structured employee reviews and long-term talent tracking.
- Applied Domain-Driven Design principles to deliver backend features in a service-oriented architecture, collaborating with cross-functional teams to meet business and compliance requirements for Japanese enterprise users.
- Technologies Used:** React, Ruby on Rails, MySQL, AWS

Software Engineer

September 2021 – October 2024

Pointwest Innovations Corporation

Quezon City, Philippines

- Led a team of 3 globally distributed developers in designing and implementing backend features for a CAD application using Java, Node.js, and custom graph algorithms to enhance cable plant design and search performance.
- Developed a web application from the ground up using Angular, aligned with client UI/UX specifications.
- Contributed to full-stack development of an inventory management system using Spring Boot (Java), Angular, and MySQL for a Fortune 500 biopharmaceutical client.
- Provided backend support for production deployments, wrote technical documentation, and conducted knowledge transfer sessions for onboarding new developers.
- Recognized with the Backend Excellence Award (March 2024) for high-impact contributions to enterprise-grade systems.
- Technologies Used:** Java, Spring Boot, Node.js, Angular, MySQL, MongoDB, AWS

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued December 2022 - Expires December 2025

AWARDS

Backend Excellence Award

Issued by Pointwest Innovations Corporation on March 13, 2024

EDUCATION

University of the Philippines Los Baños

BS Industrial Engineering

Laguna, Philippines

August 2021

Philippine Science High School - Main Campus

Secondary Education
