SUMMARY

Software engineer with 3 years experience in software development, primarily in Node.js, Java, AWS and Angular.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, C#, SQL (MySQL, Oracle, Postgres), NoSQL (MongoDB), HTML/CSS
Frameworks: Node.js, Spring Boot, Angular
Developer Tools: Git, SVN, Amazon Web Services (AWS), Unity, Docker

EXPERIENCE

Software Engineer   September 2021 – Present
Pointwest Innovations Corporation   *Quezon City, Philippines*

Design and Drafting Application

- Received "Backend Excellence Award" last March 2024, presented by Pointwest Innovations Corporation
- Led a team of 4 remote globally-dispersed developers to deliver one of the features of an computer-aided design (CAD) application, built using Unity and Node.js, for a Fortune 500 cable company based in Philadelphia, PA
- Designed and implemented microservices using Node.js, Java, MongoDB, Oracle and AWS
- Designed and built a web client application from the ground up, using Angular
- Implemented graph data algorithms for searching and building efficient cable plant designs
- Worked directly with project managers, product owners and QAs to deliver promised features on schedule
- **Technologies Used: Node.js, Unity, Java, Angular, AWS, MongoDB and Oracle**

Enterprise Inventory Manager Application

- Worked closely with a team of geographically dispersed developers, QAs, BAs, UI/UX designers and project manager to deliver an inventory management application for a Fortune 500 Biopharma company based in Radnor, PA
- Developed, tested, and integrated REST APIs using Spring Boot (Java), MySQL and Angular
- Provided backend development support for emergency application builds
- Documented backend and frontend application setups to effectively onboard new team members
- Assisted in onboarding new backend and frontend developers to the team
- **Technologies Used: Spring Boot, Java, Angular and MySQL**

CERTIFICATIONS

AWS Certified Cloud Practitioner
Issued December 2022 - Expires December 2025
